ANALYTICS PROJECT ENGINEER

📍 Liège, Belgium | Full-Time Job

About PEPITe:

PEPITe is a high-tech venture based in Liège, Belgium, at the forefront of artificial intelligence solutions for the process and manufacturing industries. As a global leader in our field, we are dedicated to driving **sustainable development** and combating **climate change** by helping companies reduce their **environmental footprint** through advanced AI technologies. Our commitment to **innovation, excellence,** and **environmental responsibility** makes us the partner of choice for businesses worldwide aiming to enhance their operational efficiency and sustainability.

Job Summary:

PEPITe is seeking an **Analytics Project Engineer** with passion to support our continued growth and innovation. You will **lead advanced analytics projects** in various **industrial sectors**, with the support of PEPITe's experienced leadership.

The ideal candidate will bring a blend of **analytical thinking**, a **thirst for problem-solving** and an **interest in manufacturing** to help PEPITe and its clients achieve their **sustainability goals**.

Main responsibilities:

- Manage Data Analytics projects across their entire lifecycle (pre-sales support, project implementation, client development);
- Become acquainted with PEPITe's clients manufacturing process and business;
- Establish efficient data collection processes to gather performance insights;
- Manage the project definition with the client, defining KPIs focused on financial and commercial metrics, as well as sustainability measures;
- Coordinate data collection and preparation phases;
- Perform data analysis using Advanced Analytics, Machine Learning and Artificial Intelligence methods;
- Identify improvement opportunities (in terms of yield, energy, throughput, quality and/or maintenance);
- Develop and implement decision support and performance monitoring tools;
- Train and coach customer staff.

ANALYTICS PROJECT ENGINEER

 Liège, Belgium | Full-Time Job

Additional responsibilities:

- Identify further improvement opportunities through workshop sessions with client staff (engineers and operators);
- Present PEPITe's methodology and success stories at client meetings;
- Provide feedback to PEPITe's development team to help guide the development of our analytics software, DATAmaestro.

Your profile:

- Engineering or Science master degree with an interest in the industrial sector;
- 2-3 years of experience working in continuous improvement projects in an industrial context is a plus;
- Fluent in English (written and oral); knowledge of French, Dutch, German or Spanish is a plus;
- Be familiar with machine learning and advanced analytics is a plus;
- Willing to travel;
- Curious, quick learner and detail-oriented;
- Team player and good communication skills.

What PEPITe offers:

- The opportunity to work on cutting-edge AI technologies with international reach and applications across various industries;
- Multi-disciplinary role focusing on various industrial sectors;
- Collaboration within a dynamic and passionate team;
- Stimulating work and development perspectives within a growing SME where autonomy is valued;
- Coaching and continuous training in a promising technical field.

Interested candidates should submit their application (CV and cover letter) to careers@pepitem.com.

PEPITe is proud to be an equal opportunity employer. We are committed to fostering a diverse and inclusive workplace and encourage applicants from all backgrounds to apply. We guarantee the confidentiality of all applications submitted for this position.
