## SOFTWARE DEVELOPER

 Hybrid, Liège, Belgium | Full-Time Job

### About PEPITe:

PEPITe is a high-tech venture based in Liège, Belgium, at the forefront of artificial intelligence solutions for the process and manufacturing industries. As a global leader in our field, we are dedicated to driving **sustainable development** and combating **climate change** by helping companies reduce their **environmental footprint** through advanced AI technologies. Our commitment to **innovation, excellence,** and **environmental responsibility** makes us the partner of choice for businesses worldwide aiming to enhance their operational efficiency and sustainability.

### Job Summary:

PEPITe is seeking a **Software Developer** with passion and keen understanding to support our continued growth and innovation. You will be in charge of the **development and integration of predictive analytics** software modules and implement efficient solutions for end-users.

The ideal candidate will bring a blend of **environmental consciousness**, and **strategic thinking** to help PEPITe and its clients achieve their **sustainability goals**.

### Main responsibilities:

- Analyze and actively contribute to software specifications and architecture within a team of skilled software developers;
- Develop source code in line with user requirements and/or software specifications when applicable;
- Collaborate with and give support to the Project Engineers team;
- Contribute to software documentation and software testing;
- Suggest and implement code improvements;
- Continuously update skills and knowledge through training and self-learning.

### Your profile:

- Master degree in Computer sciences, Mathematics, Statistics, Engineering, Robotics or Physics;
- 2-3 years of experience is a plus;
- Fluent in English (written and oral); knowledge of French;

BE A PART OF OUR TEAM.
